

IMMACULATE MULI

UI/UX DESIGNER & VISUAL DESIGNER

I'm a creative problem-solver who blends design and technology. From crafting seamless digital experiences in Figma to bringing ideas to life with posters, vision boards, and graphics in Canva, I thrive at turning concepts into visuals people love. I also have a knack for programming, which lets me bridge the gap between design and development, making sure every idea not only looks amazing but works beautifully too.
